Brand New Book. *Studies on the Nature of War* aims to place in perspective the sociocultural variables that make outbreaks of war probable, and identify for policy-makers steps that can be taken to control these variables. This first volume of the series is designed to show the many effects that war produces on the societies that are addicted to them. Twelve papers describe the evolution from antiquity to modern times of the interpretation of the causes of war and of its effects; the causes of war among pre-industrial societies; war in an ancient empire, the Roman, in a modern one, the Austro-Hungarian, and in the Soviet empire; and the various aspects of the impact of war on society, for instance, the correlation between war and personal violence, the manipulation of public communication, and the costs of war.
