

Determinants of Land Use Change in South-west Region of Bangladesh

By Jahangir Alam

GRIN Verlag Feb 2016, 2016. Taschenbuch. Book Condition: Neu. 210x148x10 mm. This item is printed on demand - Print on Demand Neuware - Research Paper from the year 2014 in the subject Geography / Earth Science - Physical Geography, Geomorphology, Environmental Studies, grade: A+, Khulna University (Economics Discipline), course: BSS (Honrs) in Economics, language: English, abstract: Like all other parts of the world, land use patterns in Bangladesh especially of south-west part have been observed to change rapidly since late of 20th century. Lands of south-west region were generally used for rice farming since the middle of 20th century but polderization project of Bangladesh during 1970s caused major changes in land use pattern either through transformation or modification of land cover and cropping. Literature shows that single cropped rice areas of past decades have already been cultivated twice or thrice per year while some such lands have already been converted for shrimp farming. This paper examines the determinants of land use patterns and their corresponding changes (i.e. rice and shrimp farming) over time at pirozpur village of Kaligonj upazila under Satkhira district of Khulna division in Bangladesh. The study is being done on the basis of cross-sectional data collected from...
