EVIDENCE-BASED COACHING VOLUME 1: THEORY, RESEARCH AND PRACTICE FROM THE BEHAVIOURAL SCIENCES

Australian Academic Press. Paperback. Book Condition: New. Paperback. 216 pages. Dimensions: 8.3in. x 5.5in. x 0.8in. Coaching in its many forms is emerging as an exciting and important branch of positive psychology. Evidence-Based Coaching (Vol. 1): Theory, Research and Practice From the Behavioural Sciences is a landmark in coaching publishing a collection of 15 peer-reviewed chapters by leading writerpractitioners that places the practice of coaching in the context of up-to-the-minute theory and research. The book presents key presentations from the First Evidence-Based Coaching Conference, which took place in July 2003 at the University of Sydney, Australia. In the workplace, coaching is beginning to move from being the latest management fad to a mainstream component of organisation development and talent management. This growing popularity of coaching as a human and organisational change methodology carries with it enormous opportunities and challenges for those who deliver coaching services and coach training. The term evidenced-based coaching was coined by staff of the Coaching Psychology Unit of the University of Sydney to describe executive, personal and life coaching that goes beyond adaptations of the popular self-help or personal development genre, is purposefully grounded in the behavioural and social sciences and is unequivocally based on up-to-date scientific knowledge. An excellent resource and guide for best practice, this book is essential reading for coaches, psychologists, managers and human resources specialists who wish to extend their theoretical and practical understanding of coaching in its various forms.
