Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1886 Excerpt: . Chestnut is hardy upon heavy clay soil, but it has always winter killed upon our light sands. The two Catalpas, *C. speciosa* and *C. Ugnonioides*, are about equally hardy. Both suffer considerably, and appear to be unreliable. As *Catalpa speciosa* has not been recognised as distinct from the older species until quite recently, the leading distinctions between the two may be given: *C. speciosa*--tree tall, a straight grower; leaves softly downy, inodorous; flowers two inches across, nearly white, the lower lobe notched; pods stout and long (1 inch in circumference). *C. bignonioides*--tree lower, diffuse in growth; leaves smooth, or nearly so, giving a disagreeable odor when touched; flowers smaller, dingy, the lower lip entire; pods more slender, leas Japan Hybrid *Catalpa* is not hardy. The Cucumber tree, *Magnolia accuminata*, was injured nearly every winter until eight or nine years old. It endured the last winter...
